

## How the online backup works?

This online backup service allows you to select which files you want to backup. In case of file corruption, accidental deletion, or hardware failure, you may restore your backed up files to the original computer or to another computer.

Depending upon the size of your initial backup it could take several days to complete the first backup. However once it finished the initial upload of your selected files, it only backs up the parts of the files that have changed since your last successful backup.

Asmarina technician will install the software on your computer, and let you select the files that you want to backup. Once the setup is finished, the software will start automatically, backing up your data files at regular intervals.

## How much does it cost?

Asmarina customers may purchase unlimited backups for \$9.99 per month for one year.

## What's so special about Asmarina online backup?

- Backup is simple to setup.
- It performs backups automatically in the background while you continue working.
- It handles versioning, storing yesterday's renditions as well as today's renditions of your files with each backup, allowing you to pull data from different backup dates.
- It encrypts all your files before transferring them to storage.
- It's fast because it backs up only the data that has changed.
- It backs up both open and locked files.
- It's inexpensive and reliable.
